DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 30-33, 35-43, and 45-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Helm et al. (U.S. 4,743,024).

Helm et al. discloses a bingo type gaming machine that matches player selected numbers or symbols with an interlinked display matrix having numbers or symbols corresponding to player selected numbers or symbols, the object being to achieve the indication of particular numbers or symbols or the like in the matrix for the winning of a prize. Helm et al. additionally discloses:

Regarding Claims 30, 38-40, and 48-49:

- at least one display displaying a plurality of groups of objects (15) and a plurality of selectable elements (22, 24) separate from the groups of objects (15), said plurality of player-selectable elements initially concealing indicia indicative of all of said objects within said plurality of groups of objects (Abstract, Column 1, lines 65-66, Column 1, lines 68-Column 2, line 21, Column 2, lines 52-55, Column 3, lines 48-50, Column 4, line 63-Column 5, line 42, and Figure 1); Each of the plurality of player-selectable elements are initially concealed in that the player is unaware of what symbols are going to appear on respective reels (22)(24) until after the player spins.

- an input device for receiving from a player sequential selections of said player selected elements (Abstract, Column 1, line 64-Column 2, line 8, and Column 4, lines 55-62);
- a central processing unit in communication with said display and said input device in response to each said selections received from said input device, said central processing unit instructing said display to reveal each of said objects associated with said selected one of said plurality of said player selectable elements, said central processing unit a player of the selectable elements and identifying any of the objects that are associated with the selected elements, said central processing unit awarding a payout associated with the one of said plurality of groups whose objects have all been revealed (Abstract, Column 1, line 46-Column 2, line 8, and Column 4, lines 55-62).

Regarding Claims 31 and 41:

- each of said plurality of player-selectable elements initially conceals indicia associated with one or more of said objects (Abstract, Column 1, lines 65-66, Column 1, lines 68-Column 2, line 21, Column 2, lines 52-55, Column 3, lines 48-50, Column 4, line 63-Column 5, line 42, and Figure 1). Each of the plurality of player-selectable elements are initially concealed in that the player is unaware of what symbols are going to appear on respective reels (22)(24) until after the player spins.

Regarding Claims 32, 33, 37, 42, 43, and 47:

- said indicia includes/associated with a letter of the alphabet, i.e. Bingo (Abstract, Column 1, line 46-Column 2, line 21).

Regarding Claims 35 and 45:

Art Unit: 3713

- each of the groups of objects (horizontal, vertical, diagonal, four corners, or other combinations) is associated with a respective payout (Abstract, and Column 2, lines 22-43).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 34, 36, 44, and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helm et al. (U.S. 4,743,024).

Helm et al. discloses that as discussed above with regards to Claims 30-33, 35-43, and 45-49.

Helm et al. seems to lack explicitly disclosing:

Regarding Claims 34 and 44:

- a touch screen to select elements.

Regarding Claims 36 and 46:

- the game is a bonus game.

However, it would have been obvious to one having ordinary skill in the art, at the time of the applicant's invention, to incorporate the element selection features in Helm's gaming machine.

Doing so provides an alternative method to Helm's "reel spin" for randomly selecting a number or symbol corresponding to the matrix. Furthermore, to one having ordinary skill in the art, it is well known to use any type of theme game as a bonus game in a slot machine. Further support of the examiner's assertion is found in applicant's specification, "One concept that has been successfully employed to enhance the entertainment value of a game is the concept of a "secondary" or "bonus"

Art Unit: 3713

game that may be played in conjunction with a "basic" game. The bonus game may comprise any type of game, either similar to or completely different from the basic game, which is entered upon the occurrence of a selected event or outcome of the basic game" (Page 2, lines 21-25).
